EDUCATION

2021 - 2025
CRACOW UNIVERSITY OF TECHNOLOGY
- Field: Computer Science
- Degree: Engineer

2017 - 2021
TECHNICAL SCHOOL COMPLEX IN JASŁO
- IT Technician

SOFT SKILLS

- Time and priority management
- Teamwork
- Openness to feedback
- Willingness to grow
- Analytical problem-solving

LANGUAGES

- English (B2)
- Polish (native)

HOBBIES

programming, self-improvment, football, gym

SUMMARY

Full-stack developer with over 4 years of experience, with a focus on backend. Professionally, I build and develop CRM/e-commerce applications in PHP using CodeIgniter; in my own projects, I build backends in Laravel, designing advanced data models and REST APIs with relational databases MySQL/PostgreSQL. I prioritize clean and testable code aligned with SOLID, Git version control, and thoughtful data model design. I am looking for a place where I can grow as a backend developer, bringing value and new ideas through an analytical approach in a team focused on quality and continuous improvement.

EXPERIENCE

InnWeb.pl • Full-stack Developer   2021 - CURRENT

Key responsibilities:
- Building and expanding web applications end to end; delivering new features and maintaining existing solutions using PHP/CodeIgniter.
- Designing MySQL databases and queries.
- Front-end work in HTML/CSS/JavaScript with Bootstrap; ensuring a responsive UI.
- Writing clean code; teamwork using Git.
- Basic SEO activities and improving website speed.

Achievements:
- Contributed to 40+ projects (CRM, e-commerce, CMS).
- Standardized Git practices, which reduced the number of hotfixes after deployments.
- Built reusable components (e.g., OAuth 2.0 login integrations) that shortened the time to deliver new features in similar projects.
- Independently led 20+ larger end-to-end deployments, working closely with the client.
- Co-created CRM modules used by 100+ internal users and serving thousands of customers.

SKILLS

- PHP
- Laravel
- CodeIgniter
- MySQL
- PostgreSQL
- WordPress
- Symfony
- REST API
- Git/Github
- Docker
- PHPUnit
- Composer/npm
- SOLID/OOP
- OpenAPI/Swagger
- HTML & CSS/SCSS
- JavaScript
- Tailwind/Bootstrap
- React

PROJECTS

Training-plan Platform with AI (MVP in progress)
- Design and implementation of a Laravel REST API (JWT auth & RBAC, validation, pagination, error handling, OpenAPI documentation).
- Design of relational databases using PostgreSQL; versioning changes with migrations; PHPUnit tests.
